

Laid In-situ Fibre Reinforced PU Seamless OLYMFLEX

Advantages over Rubberized Mats in Rolls

- **No Join and Glue Problems** unlike mats that come in Rolls.
- **Will Not Warp** after long usage unlike those that come in Rolls.
- **Seamless and laid in-situ as One Whole Smooth Surface.**
- **Able to Withstand Moisture and Weights.**
- **Fire Resistant and No Ant/Termite Problems.**
- Gives an **Even, Level Surface** even if concrete base is uneven.

OLYMFLEX Rubberized Floors are designed to combine shock absorption and other safety features without compromising performance. Safety is OLYMFLEX Rubberized Floor's top priority as most sports-related injuries can be avoided if the sport floor provides sufficient shock absorption to cushion the impact and to reduce stress on knee joints.

Project done in Technology University of Malaysia (UTM)

Multi-purpose hall for University Technology Malaysia (UTM), Johor using OLYMFLEX Green coating that provides a seamless smooth surface to give an elegant look.

Completed yellow futsal lines and white badminton lines drawn on OLYMFLEX rubberized floor in Johor's University Technology Malaysia's multi-purpose sports complex.
