

Venture Rubberized Sports Floor

Venture Rubberized Sports Floor can be either **laid in-situ** as gym floor system or as Mobile Mat reinforced by high strength fiber base mat with flexible mesh. As for sports floor laid in-situ, it consists of a layer of rubber base mat 5mm to 13mm thick or any choice of thickness to suit specification and finished with **fortified polymer coating system** or **PU coating**. When applied on top of 100% recycled black SBR rubber granules layer, the elastic floor coatings provide a resilient surface for player comfort, safety and performance. Venture Rubberized Sports Floor offers excellent durability, slip-resistance and less impact to the knees.

Different Layers

Venture Rubberized Floor is excellent in **Ball Bounce, Ball Roll** and provides a seamless smooth one whole surface for low maintenance. It can be made **modular** and be removed and re-used elsewhere. The coloured top coating provides excellent abrasion and good traction. This product is made in Malaysia and comes in any colour to suit your choice.

Advantages:

- ❖ It has no joint or glue problems.
- ❖ It is applied in a single pour and gives a uniformly leveled surface even if the concrete base is uneven.
- ❖ Provides a seamless, smooth one whole surface.
- ❖ No ants/termites problems.
- ❖ It is fire resistant since material is predominantly rubber based.
- ❖ It can withstand heavy gym equipment and moisture.
- ❖ It will not warp after years of usage.

Usage:

Futsal Courts, Badminton Courts, Multi-purpose Sports Courts, Multi-purpose Halls, Rubberized Mats, Sports Floor, etc
