For many players, coaches and administrators alike, outdoor carpet is their preferred surface. Why? Quite simply it offers excellent play characteristics and is less affected by adverse weather or extreme temperature conditions than any other surface.

Developed in Australia the short pile TigerTurf range is tested to ITF standards and is classed as a medium to fast surface, which takes spin and offers excellent grip. Installed by experts trained 'in house', TigerTurf Tennis is available in a combination of exciting colours, which now include blue. Moreover, players of all ages and abilities benefit from the added resilience offered by the dense fibre.

The fast growing sport of Padel Tennis has taken southern Europe by storm in recent years and will soon be seen around clubs in the UK. The resilience and grip offered by TigerTurf Padel ensures players can develop skills at speed in the confines of the walled court. Creative colour choices enhance appearance and attract new players to the world of Padel.
